

REMARKS/ARGUMENTS

In response to the Advisory Action dated July 18, 2007, the Applicant offers the following submissions and amendments.

Amendments

The drawings have been amended such that Figures 17 to 20 show only one reference numeral 8.

Accordingly, the amendments do not add any new matter.

Conclusion

Amended Figures 17-20 have deleted one of the two reference numerals '8'. The Detailed Description explains that reference numerals '8' indicate the multilayer substrate supporting the nozzle structure. The multilayer substrate 8 includes the silicon wafer as well as the CMOS metal layers. To indicate this, both the silicon and the CMOS have been indicated with a reference number 8. However, by deleting one of the reference numeral 8's, the possibility of ambiguity or confusion is eliminated. Accordingly, we trust that the application can proceed to allowance.

Very respectfully,

Applicant/s:
